NUS Science Summer Camp

2025 in Review

Highlights

Held over five days in July 2025, the 15th edition of NUS Science Summer Camp brought together Grade 10-12 students from 16 nationalities and 60 schools. The campers immersed themselves in a mix of activities including lectures, experiential STEM workshops, lab visits and quizzes.

Discovering the microscopic world

The juicier side of food science

Understanding sustainable fuel

Hands-on activities during lectures

Exploring traits of living things

Witness scientific phenomena

What Participants Say

Participation (America)

I liked how all the work was interactive, not just one way learning!

Participant (India)

This camp exceeded my expectations. The presenters were excellent, and the hands-on activities were really helpful. I feel more confident and equipped with more skills.

Participant (Malaysia)

Fun and informative experiments with clear and detailed explanation provided!

Participant (Singapore)

As a biochemistry student, I didn't understand much of the physics content at first. But the workshops clarified everything and improved my understanding significantly.

Participant (China)

All of them are really interesting and I can see the good resources NUS can provide to its students!

Participant (Korea)

Lots of things that I couldn't experience in my school!

Participant (Indonesia)

It was very memorable! All the facilitators, instructors and teachers were so nice. Thank you for guiding us! I met a lot of new friends which were very nice too and we have a lot of fun!

Participant (Philippines)

Interesting and in-depth experiments! Making new friends and experiencing college life at NUS were also memorable moments of the camp for me.

★★★★★
Come join the fun and build friendships with peers from Asia and beyond!
